

CINEBAR PRO 2 for Dolby Atmos In the spotlight: sound

The CINEBAR PRO 2 for Dolby Atmos is Teufel's new flagship soundbar, taking home entertainment to the next level. Featuring 10 powerful drivers and dedicated up-firing channels, the fully active system delivers true 5.1.2 sound.

Thanks to its integration into Teufel Home streaming and the option to expand it into a 7.1.2 setup, the new flagship consistently carries the strengths of Teufel soundbars into the next generation.

Berlin, 13 October 2026 – With the CINEBAR PRO 2 for Dolby Atmos, Teufel presents the most powerful soundbar in the CINEBAR range to date. The fully active 5.1.2 system combines expansive acoustics, modern HDMI 2.1 connections and smart Wi-Fi streaming features in a sleek solution that finally makes a traditional AV receiver in the living room obsolete. To guarantee this uncompromising home cinema experience for TV, films, music and gaming, the new flagship is deliberately not designed as a standalone device: only in dynamic combination with the new T 10 Mk2 subwoofer does the CINEBAR PRO 2 unleash its full power.

All the key facts at a glance:

- **New flagship soundbar** in the premium class, designed as a fully active 5.1.2 system for home cinema, music, gaming and working from home.
- **Dolby Atmos and DTS:X** with Teufel Dynamore® technology for room-filling, cinematic 3D sound.

- **Expansive acoustics with 10 integrated drivers:** 3 coaxial drivers (comprising three tweeters and three mid-woofers), 2 side-firing full-range drivers and 2 up-firing drivers that direct sound towards the ceiling so it is reflected back to the listening position.
- **Full format support:** Compatible with all common audio formats, including Dolby TrueHD, Dolby Digital Plus, DTS-HD and DTS Digital Surround.
- **Teufel Home integration** for high-resolution Wi-Fi streaming via AirPlay 2, Google Cast, Spotify Connect, TIDAL Connect and TuneIn, plus Bluetooth 5.3 with AAC.
- **Modern connections:** 2 HDMI 2.1 inputs, HDMI eARC/CEC, optical digital input, AUX, Ethernet and a wireless subwoofer output.
- **New T 10 Mk2 subwoofer:** As the soundbar requires a subwoofer, it is always offered as part of a set. Teufel's new T 10 Mk2 subwoofer connects wirelessly, delivering deep, powerful bass and flexible positioning in the room (also available in the Select bundle with the compact T 8 subwoofer).
- **Surround expansion:** Can be expanded wirelessly into a 7.1.2 setup with optional EFFEKT 2 rear speakers.
- **Maximum convenience:** OLED display, touch controls, infrared remote control, operation via the Teufel Home app and smart sound modes (Movie, Music, Game, Voice+, Night).

Spatial sound with precision and audio from above

Whether it is thunderous explosions, a helicopter flying overhead or pouring rain, the CINEBAR PRO 2 brings the sound of the latest blockbusters noticeably closer to the action. The 5.1.2 system uses a total of ten drivers. A particular highlight of the front soundstage is the three coaxial drivers: because the tweeter and mid-woofer sit on the same acoustic axis, each acts as an almost perfect point source. This ensures exceptionally precise localisation of instruments, crystal-clear voices and a far more stable stereo image that remains intact even when listeners sit outside the ideal listening position (sweet spot). The two 3.5-inch upfiring drivers are equally impressive, directing sound upwards to make full use of the height dimension of Dolby Atmos and DTS:X. Together with Teufel's proprietary Dynamore® technology, they add height, width and spatial movement to the soundstage for a room-filling listening experience.

Smarter streaming, superb connectivity

The CINEBAR PRO 2 is not only a home cinema device, but also a state-of-the-art streaming hub. Teufel Home integration provides AirPlay 2, Google Cast, Spotify Connect, TIDAL Connect and TuneIn, allowing playlists and podcasts to be played in outstanding Wi-Fi quality. Bluetooth 5.3 is also included. As the central hub for TVs and consoles, the soundbar boasts two HDMI 2.1 inputs and HDMI eARC/CEC, enabling it to handle all source devices and modern audio formats with ease.

Deep bass and wireless expansion

Because the CINEBAR PRO 2 is uncompromisingly designed for maximum performance and is not a standalone soundbar, the entire low-frequency range is handled by an external specialist. The brand-new T 10 Mk2 subwoofer provides the powerful acoustic foundation. It connects

wirelessly, delivers deep, powerful bass and can be positioned flexibly in the room. Those who want to take the surround experience to the highest level can expand the soundbar: with the optional wireless EFFEKT 2 speakers, the 5.1.2 setup becomes a 7.1.2 system, adding rear channels for even more precise surround effects behind the listeners.

A statement for every living room – effortless to use

For all its power, the CINEBAR PRO 2 impresses with a sleek, living-room-friendly design. Available in Night Black or Pure White, it makes a clear statement beneath the TV without dominating the space. The principle is simple: set up, switch on and immerse yourself. In everyday use, a brilliant OLED display, touch controls on the device, an infrared remote control and the Teufel Home app provide intuitive convenience. With the Movie, Music, Game, Voice+ and Night sound modes, the perfect sound profile for every situation is available at the touch of a button.

About Lautsprecher Teufel

Teufel is Europe’s largest direct retailer of audio products. Its broad range includes home cinema systems, TV sound solutions, multimedia systems, traditional hi-fi, headphones, Bluetooth speakers and multiroom speakers. The company began developing loudspeaker kits in Berlin in 1979 and has since become a renowned consumer electronics brand across Europe. In addition to its German online shop, Teufel operates numerous European online shops, making its products available throughout Europe. Since July 2024, Teufel has also been represented in the USA, offering selected products in collaboration with Fender. Since the company was founded, great sound has always come first at Teufel. Countless awards from consumers, the press and

online media attest to its success. Teufel is only available from Teufel: its products are sold exclusively through the Teufel online shop, online marketplaces, the hotline and Teufel brand stores. Further information is available at www.teufelaudio.com.
